

ABSTRACT

NIGHT PARTY FASHION BY MATERIAL VOLCANO SOURCE IDEA USING LURIK WOVEN

By: -

The objectives of this Final Project are : first, to be able in creating a night party fashion with material volcano source idea using lurik woven cloth. Second, to be able in making party fashion with material volcano source idea using lurik woven cloth. Third, to be able to organize fashion staging with “Secret of Tradition” theme which performs night party fashion by material volcano source idea using lurik woven cloth.

In creating a design of a night party clothing by this material volcano source idea, the author applied substance and principal design and placed an idea of material volcano focusing on a rock shape occurred in melted lava. The implementation of source idea to the design has been passed through three stages: first stage is preparation involving fashion’s outline drawing making, adorn’s and fashion supplementary’s outline drawing, presentation, size taking, pattern making, material and price planning, material cloth selection, and material reduction. Second stage is implementation involving pattern laying to material cloth, material cloth cutting, sewing marking, stitching, fitting I, sewing, fitting II, adorning, and finishing. Third stage is evaluation; result of the whole process reported that the fashion created has been appropriate fitted with theme, design, and sewing technique. The implementation of fashion show staging is covering three stages, first is preparation stage which covers committee establishment, determining theme, determining time and place, and determining budget. Second stage is implementation stage which is the show staging held on Sunday, June 1st 2008 at Auditorium Building of UNY, while the third stage is evaluation from the whole activities from the beginning that subjected to be suited and appropriate with staging plan.

The result of author’s fashion design is an adult night party fashion by material volcano source idea using lurik woven material cloth with an A silhouette consists of a long double bustie gown and six pale line skirt made of lurik woven cloth and street satin. This gown is supplemented with short shawl chest-covered made from lurik woven cloth. Fashion making involving preparation, implementation, and evaluation. This night party fashion by material volcano source idea performed by DIY’s PAPMI model participated from the group of Reguler Diploma with queue number 70. In this fashion staging, fashion made by the author has been given second champion.
